EDUCATION

2023 - present B.E. in Information Science Engineering at **RV College of Engineering, Bengaluru**
(GPA: 9.15)
2022 Class 12th CBSE Board at **Holy Child Sr. Sec. School, Sonipat** (96.4%)

PROJECTS

StudyMatch

[Link to Demo](#)

- Built a collaborative study platform using React, Node.js, Express, and MongoDB, Socket.io and deployed it.
- Implemented user authentication, profiles, and real-time matching of students based on study subjects.
- Designed interactive dashboards with to-do list, and group/solo study rooms with video integration (Jitsi).

College Canteen Pre-Ordering System

[Link](#)

- Tech Stack- React.js, Node.js, Express.js, MySQL, Tailwind CSS
- College Canteen Pre-Ordering System — A full-stack food pre-ordering and order management platform enabling users to browse menu, place orders, pay via UPI QR, and track order status, while providing admins with real-time order monitoring, preparation tracking, menu management and analytics.

PolyCentric: AI-Based Urban Zone & Business Intelligence Platform

[Link](#)

- Tech Stack- React.js, Flask, SQLAlchemy, PostgreSQL
- Designed and developed an AI-powered system to classify urban zones using rule based scoring and analyze public sentiment using NLP techniques.
- Built a rule-based recommendation engine and a semantic business matching module using vector embeddings to provide actionable urban insights.

SKILLS

Language	C, C++, Python
Web development	HTML, CSS, Javascript, React, Node.js, MongoDB, MySQL, PostgreSQL
Libraries	NumPy, Pandas, Matplotlib

COURSES & CERTIFICATIONS

Data Science for Engineers – NPTEL (IIT Madras)	82%
Introduction to Graph Algorithms – NPTEL (IISc Bangalore)	93%
